Dish-Centric Disc... AI Version 2

Download wireframes for review
Version 2

show me the wireframes in a form I can download and review

Reasoning

I'll create a wireframes overview page that shows all the key screens of the app in a visual grid layout that you can screenshot or review. Let me add this as a new route:

Worked with 2 files

Perfect! I've created a comprehensive wireframes overview page. Here's how to access and download it:

How to Review the Wireframes:

Visit: `/wireframes` in your app

This page includes:

1. **All 8 Screen Cards** - Each card shows:
   - Screen title and description
   - Key features list
   - "View Live" button to see the interactive version
2. **Information Architecture** - Core entities, ranking logic, and UX principles
3. **Primary User Flows** - Visual flow diagrams for the 3 main user journeys
4. **Design System** - Colors, components, typography, and layout guidelines

Download Options:

1. **Print to PDF**: Right-click on the page → Print → Save as PDF (includes everything in one document)
2. **Individual Screenshots**: Click "View Live" on any screen and take screenshots of the mobile interface
3. **Full Documentation**: The wireframes page itself serves as a complete specification document

The page is designed to be printer-friendly and provides a comprehensive overview you can share with stakeholders or use for development reference!

DishDiscover — Wireframes & Screens

Mobile-first MVP for dish-centric discovery. Click any screen to view live version.

1. Home Screen

View Live

Search bar, location, trending dishes, top-rated dishes

Key Features:

- Prominent search bar with autocomplete
- Location indicator (NYC)
- Trending dishes nearby section
- Top-rated dishes this week section
- Card-based layout with images, ratings, tags, price

2. Search Results

View Live

Ranked list of dish instances with sorting & filtering

Key Features:

- Back navigation
- Result count display
- Sort by: Best Overall, Nearest, Highest Rated, Best Value
- Filter drawer: distance slider, price level checkboxes
- Ranked cards with position badges (1, 2, 3...)
- Image, restaurant name, neighborhood, rating, distance, tags

3. Dish Detail

View Live

Full dish information, reviews, and CTA to review

Key Features:

- Hero image carousel
- Dish name + restaurant name (clickable)
- Price and price level
- Star rating and review count
- Flavor/texture tags (chips)
- Details: location, value score, portion size, would order again %
- Reviews list with structured cards
- Fixed bottom CTA: "Review This Dish"

4. Review Submission

View Live

Structured form for submitting dish reviews
